1. INTRODUCTION

- EduGenie is an AI-powered learning assistant designed to help students learn and understand different subjects easily.
- It uses Google Gemini AI to answer students questions and provide simple explanations.
- Students can type their questions into EduGenie and receive an AI-generated answer.
- The system can be used for learning, doubt clarification, exam preparation, and generating study materials.

2. OBJECTIVES

- To develop an AI-powered educational assistant.
- To allow students to ask questions using natural language.
- To help students generate study notes and summaries.
- To provide interactive learning support.
- To reduce the time required to search for educational information.
- To create a user-friendly learning environment.

3. PROBLEM STATEMENT

- Students often spend a lot of time searching for answers and explanations from different sources.
- Sometimes the information available online can be difficult to understand.
- EduGenie solves this problem by providing an AI-based platform where students can ask questions and receive quick explanations in one place.

4. PROPOSED SYSTEM

- EduGenie provides a single platform for AI-based learning assistance.
- The student enters a question, and EduGenie sends the question to Google Gemini.
- Gemini processes the question and generates an answer.
- The answer is then displayed to the student.

Simple Workflow

Student → EduGenie → Google Gemini → Answer → Student.

5. EXISTING SYSTEM

In the existing system, students mainly use:

- Textbooks
- Teachers
- Search engines
- Educational websites
- YouTube

6. SYSTEM REQUIREMENTS

- environment
- Google Gemini API access
- Hardware Requirements
- Computer/Laptop
- Minimum 4 GB RAM
- Internet connection
- Software Requirements
- Windows/Linux
- Web browser
- Visual Studio Code
- Required programming

7. SCOPE OF THE PROJECT

EduGenie can be used by;

- School students
- College students
- Teachers
- Self-learners
- Competitive-exam learners

8. TECHNOLOGIES USED

The technologies can include:

- FRONTEND : HTML, CSS, JavaScript
- BACKEND : Python / Node.js
- AI : Google Gemini API
- DATABASE : MySQL / Firebase (if required)
- DEVELOPMENT TOOL : Visual Studio Code
- INTERNET : Required for Gemini API communication

9. MAIN FEATURES

- Ask questions using natural language.
- Get AI-generated answers.
- Simple explanation of difficult topics.
- Generate summaries.
- Generate study notes.
- Ask follow-up questions.
- Useful for exam preparation.
- Easy-to-use interface

10. CONCLUSION

- EduGenie is an AI-powered learning assistant that uses Google Gemini to help students learn more effectively.
- It provides quick answers, simple explanations, and study assistance through an interactive interface.
- The project demonstrates how Generative AI can be used in education to support students and make learning more convenient and interactive.

"less stress, more success with edugenie"

11. THANK YOU

Thank You!
